

Formula 90 Powder

Buffered carpet detergent for all your heavily soiled cleaning jobs - commercial and residential. Heavy-duty, highly concentrated, triple-strength carpet cleaning detergent for use with truck mounts or portable extractors. Delivers consistent, powerful cleaning on every job.

Concentrated solution for 'stock'

1. Mix 1.25 kg of concentrate to 17 ltr of water

Ready to use solution

1. Mix 30 - 60ml of concentrated solution product to 19 ltr of water

For optimum de-foaming

1. Mix and use within a 10 hour period. After 10 hours cleaning performance will not be affected but de-foaming capabilities may be reduced.

General hints

Fill your container a quarter full with warm water. While continuing to fill the container with water gradually add the proper amount of product simultaneously until the powder is mixed according to the instructions. Stir mixture until powder is dissolved.

Formula 90 Characteristics

pH @ use: 10.0 - 11.0

Coverage: Upto 280 sq M per 500g

Dilution: 28/56g to 20 Ltr water or for the 'stock' solution 24 scoops to 20 Ltr water

Appearance: Light Yellow Powder

Fragrance: Citrus

Packaging: Tub 10 kg or Case 4 x 2.72kg

ALWAYS pre test areas to be treated

What Does It Do?

Inhibits corrosion

The right combination of proven corrosion inhibitors have been added for maximum protection of all metals commonly found in steam extraction equipment.

Self de-foaming

Lab tested and job proven special de-foamers prevent foam build up in recovery tanks for better equipment performance and cleaning results.

Crisp, dry residue

Product dries to a non tacky crystalline powder which can easily be vacuumed away. Minimum residue allows for a longer lasting, higher level appearance between cleanings.

pH buffered

Special buffering agents have been added to maintain an optimum pH over a wide range of dilutions.
