

Kill Odour Citrus

Excellent all purpose deodoriser designed for pre-spraying as a contact deodoriser to kill odours. Quat for use on mould, mildew, spore & fungi as well as vomit, smoke, perspiration, rancid foods, oils and problem odours.

Easy to use

Simply spray properly diluted product on affected area using a portable hand pump sprayer or electric sprayer. May also be added to the cleaning solution to provide a clean fragrance to both carpet and air.

Directions for use

1. Generally dilute Kill Odour with 5 parts water. For very heavy odours, dilute with less water.
2. Using hand pump sprayer or electric sprayer apply liberally on affected area with a coarse spray. **CANNOT** be fogged.
3. Allow to remain on affected area as long as possible. Then clean using generally accepted carpet cleaning techniques. If odour persists, repeat procedure.
4. If entire carpet needs treatment, the amount and dilution depends on strength of the odour.

Packaging: Case 4 x 3.78 Ltr

What Does It Do?

Effective on hardest to remove odours

Works on urine, vomit, smoke, perspiration, medicinals, and rancid foods and oils.

Especially formulated for the professional in plant or on location carpet cleaner

Can be used in plants with drying rooms to eliminate the odour sources which result from high humidity or can be applied on location as prespray to treat carpet itself.

Treat odours in the carpet backing or pad

Kill Odour will work deep down in the carpet backing or pad to effectively neutralise odours and their sources when applied with a needle injector. Needle injecting of Kill Odour is an economical alternative to the expensive method of taking up carpet to remove odours.

Removes odours on hard surfaces

Effective in the removal of odours from ceramic tile, concrete, wood, vinyl, plastic, marble and other hard surfaces. May be wiped, sponged or mopped with the finest results expected on hard surfaces. An excellent replacement for harsh pine oil cleaners.

Economical to use

concentrated for use up to 64:1 on hard surfaces.

ALWAYS pre test areas to be treated
