

Ultrasnap™

ATP Testing Device

Ultrasnap is a user-friendly, self-contained ATP testing device. The test is made up of a premoistened swab bud with a cationic agent to release ATP from any intact cells and aid in soil removal; a unique liquid-stable enzyme reagent; and patented Snap Valve™ technology for easy activation. The unique liquid-stable enzyme reagent offers exceptional accuracy and reproducibility. Ultrasnap can be used in any of Hygiene's ATP hygiene monitoring systems.

Key Features

- ✓ All-in-one sampling device
- ✓ Easy to use
- ✓ Results in seconds
- ✓ Unique liquid-stable reagent provides unprecedented accuracy & reproducibility
- ✓ 12-month shelf life at refrigerated temperatures (2-8°C)
- ✓ 4-week shelf life at room temperatures (21°C)
- ✓ Tolerant to temperature abuse and sanitizers
- ✓ Costs up to 50% less than other ATP tests
