

# Oriental Rug Shampoo

Safely handles delicate rug fibres and sensitive dyes in all carpet fibres. Suitable for on site or in- plant cleaning. A "Woolsafe" approved shampoo for use in equipment that is equipped for high foam only i.e. Rotary Shampoo machines.

## For rotary extraction

Mix 240ml of product with each 4L of warm water (16:1 dilution ratio).

## For dry-foam equipment

Mix 480ml of product with 4L of warm water (8:1 dilution ratio).

## What Does It Do?

### Buffered pH

The optimally efficient pH range of 7.0 – 7.3 yields maximal cleaning while safely handling sensitive dyes.

### Free rinsing

Specially formulated to leave a minimum of residue, leaving a plush hand and maximum sheen.

### Approved for use on wool

Independently tested for use on wool according to The Woolsafe Organisation's performance criteria.

### General usage

1. Thoroughly vacuum the entire carpet before cleaning.
2. Place cardboard or plastic under machine when filling tank over carpeted area.
3. Use a hand brush to clean corners and other areas the machine cannot reach.
4. Clean carpet in 1 metre squares if using a rotary cleaning machine. When cleaning with a foam generating machine, clean in a straight line and overlap after each pass.
5. Use a hand pile brush to set pile in one direction after cleaning.
6. Use plastic protectors under all furniture that will touch wet carpet
