

Fast Drying Upholstery Shampoo

High foaming anionic upholstery shampoo for use by hand methods or use in a foam generating machine. Special quick drying agents decrease drying times.

Concentrated for economy

Chemspec Fast Drying Upholstery Shampoo is an economical concentrate. Dilutes with 12 parts water to make efficient, soil-removing upholstery cleaning use solution for maximum economy.

Advanced formula

Fast Drying Upholstery Shampoo has added advanced-formula, quick-drying agents to speed drying time. The extra quick drying results in moisture leaving the fabric faster and reducing the possibility of shrinking. You have more "control" over the cleaning and the final results.

Colourfast Extraction Upholstery Cleaner Characteristics

pH @ use: 7.0 - 8.0

Coverage: n/a

Dilution: 360ml to 4Ltr (hand)

480ml (dry foam equipment)

Appearance: Clear Yellow Liquid

Fragrance: Alcohol

Packaging: Case 4 x 3.78 Ltr

What Does It Do?

Rich, stable, soil lifting foam

Product will efficiently cut and lift greasy types of soil and suspend it away from the fibre until vacuumed. This suspension is achieved through a unique, rich, stable, soil-lifting foam important to professional upholstery cleaners. Soil is not "pushed" into the upholstery like other shampoos on the market.

Crisp, dry residue retards soiling

Any shampoo residue remaining after foam removal dries crisp and completely. The crisp, dry residue is designed to tie-up any greasy or oily soil for fast complete dry vacuum removal. The result - no oil, no soil, and no residue to promote re-soiling. Upholstery appearance remains higher, longer.

Reduced chance of "bleeding" upholstery dyes

The addition of special quick-drying agents in our formulation reduces the time that upholstery dyes remain moist, thus increasing the range of upholstery dyes which will not "bleed" during the drying cycle.

ALWAYS pre test areas to be treated
