

EncapBrite Soil Retardant

A highly concentrated encapsulation cleaner designed for interim carpet maintenance cleaning. Formulated with a specialised soil retardant that dramatically reduces the surface energy of the fibres and lowers the ability for soils to bond with fibers after cleaning.

Safe on Wet Cleanable Fibres

Works with hot and heated bonnet systems.

Brightens Carpets

Increase cleaning power even more just add 30ml of Energiser to each ready to use solution.

What Does It Do?

Maintains appearance between cleaning

Combines the benefits of minimum residue with the advantage of a carpet protector. The small amount of solution put into the carpet builds a residual effect, making subsequent cleanings faster and easier; maintaining the appearance of the carpet longer.

Saves on labour costs

Faster cleaning, faster drying, better encapsulation and longer carpet protection. Used as directed the operator can clean 372 sq M per hour.

Eliminates indoor air pollution

Solvent free to help rid air pollution caused by chemical odours and creating a healthier environment.

Easy to use

Mix 400ml of EncapBrite SR with 4 litres hot, warm or cold water. All cleaning is improved with warmer water if available.

Apply to carpet using machine manufacturers recommended use instructions.

ALWAYS pre test areas to be treated

EncapBrite SR Characteristics

pH @ use: 8.5 – 9.5

Coverage: Upto 1,200 sq M per 3.78 Ltr

Dilution: 400ml to 4 litres water

Appearance: Light Yellow Liquid

Fragrance: Floral

Packaging: Case 4 x 3.78 Ltr
